Epistemology: The Key Thinkers From Bloomsbury Academic

Exploring what great philosophers have written about the nature of knowledge and about how we know what we know, this is a concise and accessible introduction to the field of epistemology.

Epistemology: The Key Thinkers tells the story of how epistemological thinking has developed over the centuries, through the work of the finest thinkers on the topic. Chapters by leading contemporary scholars guide readers through the ideas of key philosophers, beginning with Plato and Aristotle, through Descartes and the British empiricists, to such twentieth-century thinkers such as Wittgenstein, Quine, Goldman, and beyond. The final chapter looks to the future, highlighting some of the very latest debates that energise philosophical writing today about knowledge.

Each chapter ends with a guide to further reading, encouraging students to explore the key writings for themselves, making *Epistemology: The Key Thinkers* a perfect guide for study, revision, and reference.

Editorial Review

Review
'There has long been a serious need for a systematic look at the history of epistemology. This volume, written by experts on the various figures who have done so much to shape epistemology as it now is, will go a long way toward filling that gap. It should be essential reading for epistemologists and historians alike.' (Baron Reed, Associate Professor of Philosophy at Northwestern University, USA)

'The best history of philosophy is the wellspring of insightful metaphilosophy. This volume is a prime example of both. As these essays so vividly show, the history of epistemology may be a singularly bountiful supply of metaphilosophical insights, for the sharpness of its main problems and the complexity in its most seductive failures.' (Claudio de Almeida, Professor of Philosophy, Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil)
