Ocean Life (Visual Explorers) By Toby Reynolds, Paul Calver

The books in this *Visual Explorers* series feature page after page of dramatic, full-color photographs. Inside, kids can get up-close and personal with dangerous animals, natural wonders, ocean life, and the mysteries of the rainforest. In *Ocean Life*, engaging text, detailed facts, and impressive statistics give children exciting scientific insight into amazing life forms, some that look more alien than anything else. A glossary at the end of each book helps reinforce the information. Parents, teachers, and librarians will want to collect all of the books in this series to create a very cool first encyclopedia to build early research skills. (Ages 8 and up)

Editorial Review

Review
“Earth is a spectacular, constantly changing planet with diverse, powerful, and weird life-forms. The proof can be seen in these attractive, slim paperbacks in the Visual Explorers series. As the series name suggests, high-quality color photographs drive the interest while short text boxes introduce key concepts and supportive facts in double-page spreads. Following an overview of ocean zones, Ocean Life looks at how life varies along the coast and in ocean forests, coral reefs, and icy waters. It then focuses on types of marine animals, including fish, whales, sharks, crustaceans, echinoderms, and seabirds. Visually rewarding for reluctant readers.”
—*Booklist*

“This series reveals Earth’s wonders to inquisitive readers, covering topics from acid rain to slime molds in three wildly colorful and glossy, slim paperbacks. The visuals are the strength of this set and will especially appeal to reluctant readers.”
—*School Library Journal*
