Deep Time in Genesis By Steven R. Webb

The early chapters of Genesis have generated a battleground between people that believe the Earth is very young (on the order of 6000 years) and those that believe it is much older. What has been mostly missing from this battle are the observations of professional Christian geologists. Webb invites you to join his world to see the kind of work that geologists do that leads them to draw certain conclusions on this subject. It is written in laymen's language and is designed to unite a variety of issues ranging from Noah's Flood to dinosaurs to early hominids to the Garden of Eden, etc. while maintaining the integrity of Scripture.
