Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) From Brand: SAGE Publications Ltd

Qualitative research has become a legitimate approach within the information systems community, but researchers have traditionally drawn upon material from the social sciences given the absence of a single source relevant to them. **Qualitative Research in Information Systems: A Reader** represents just such a volume and is both timely and relevant.

Information systems and qualitative research articles are now widely used for teaching on many upper level courses in information systems, and there is demand for a definitive collection of these readings as a basic reader and teaching text. This book expertly brings together the seminal works in the field, along with editorial introductions to assist the reader in understanding the essential principles of qualitative research.

The book is organised according to the following thematic sections:

· Part I: Overview of Qualitative Research

· Part II: Philosophical Perspectives

· Part III: Qualitative Research Methods

· Part IV: Modes of Analyzing and Interpreting Qualitative Data

Qualitative Research in Information Systems: A Reader should become the benchmark reference point for students and researchers in information systems, management science and others involved in information technology needing to learn about qualitative research.

Editorial Review

About the Author
Michael D. Myers is Professor of Information Systems and Head of the Department of Information Systems and Operations Management at the University of Auckland Business School, Auckland, New Zealand. He has won numerous awards including Best Paper award for the most outstanding paper published in *MIS Quarterly* in 1999. He served as President of the Association for Information Systems (AIS) in 2006-2007 and is a Fellow of AIS.

David Avison is Distinguished Professor of Information Systems at ESSEC Business School, near Paris, France after being Professor at the School of Management at Southampton University for nine years. He has also held posts at Brunel and Aston Universities in England, and the University of Technology Sydney and University of New South Wales in Australia, and elsewhere. He is President-elect of the Association of Information Systems (AIS). He is joint editor of Blackwell Science's Information Systems Journal now in its eighteenth volume, rated as a 'core' international journal. So far, twenty-five books are to his credit including the fourth edition of the well-used text Information Systems Development: Methodologies, Techniques and Tools (jointly authored with Guy Fitzgerald). He has published a large number of research papers in learned journals, edited texts and conference papers. He was Chair of the International Federation of Information Processing (IFIP) 8.2 group on the impact of IS/IT on organisations and society and is now vice chair of IFIP technical committee 8. He was past President of the UK Academy for Information Systems and also chair of the UK Heads and Professors of IS and is presently member of the IS Senior Scholars Forum. He was joint programme chair of the International Conference in Information Systems (ICIS) in Las Vegas (previously also research programme stream chair at ICIS Atlanta), joint programme chair of IFIP TC8 conference at Santiago Chile, programme chair of the IFIPWG8.2 conference in Amsterdam, panels chair for the European Conference in Information Systems at Copenhagen and publicity chair for the entity-relationship conference in Paris and chair of several other UK and European conferences. He will be joint program chair of the IFIP TC8 conference in Milan, Italy in 2008. He also acts as consultant and has most recently worked with a leading manufacturer developing their IT/IS strategy. He researches in the area of information systems development and more generally on information systems in their natural organizational setting, in particular using action research, though he has also used a number of other qualitative research approaches.

Users Review

From reader reviews:

Linda Yohe:

This Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) book is just not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this publication incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This specific Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) without we realize teach the one who reading it become critical in imagining and analyzing. Don't always be worry Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) can bring once you are and not make your case space or bookshelves' become full because you can have it in your lovely laptop even mobile phone. This Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) having fine

arrangement in word in addition to layout, so you will not sense uninterested in reading.

Darius Cramer:

Reading a guide tends to be new life style with this era globalization. With studying you can get a lot of information that may give you benefit in your life. Using book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or maybe their experience. Not only the storyplot that share in the books. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors nowadays always try to improve their skill in writing, they also doing some exploration before they write for their book. One of them is this Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series).

Dora Bair:

Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) can be one of your beginning books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to get every word into joy arrangement in writing Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) however doesn't forget the main place, giving the reader the hottest and based confirm resource data that maybe you can be one among it. This great information may drawn you into new stage of crucial thinking.

Melvin Schroeder:

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just minor students that has reading's internal or real their passion. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Qualitative Research in Information Systems: A Reader (Introducing Qualitative Methods series) can make you truly feel more interested to read.
