Latin is one of the oldest languages in the world. It is also one of those languages that seems not to have evolved much even as different languages have continued to evolve; the meanings of words or the pronunciation of different words and phrases has remained unchanged for ages making it a perfect method of preserving critical information.

For instance, every plant or animal has a scientific name, which is usually in Latin. Lawyers also seem to have their own Latin jargon. Although no one now speaks Latin as his or her native language, this doesn't in any way mean that the language is extinct. In fact, the Catholics have for a long time been learning Latin to help them interpret the bible better.

Even if Latin were to go extinct, do you know that the use of Latin is still in use in literally every facet of English conversations and general human life such that we use Latin without even knowing it. Do you know that you can learn it and speak it whenever and wherever you want? This book will teach you how to start speaking Latin without boring you with countless grammar rules.
