Evidence-Based Cardiology By Benjamin A. Steinberg, Christopher P. Cannon

Get quick, portable access to the evidence you need to make effective clinical decisions! Evidence-Based Cardiology succinctly summarizes all the clinical trials that affect the practice of cardiovascular medicine, making it easy for you to implement the most appropriate diagnostic tests and treatments for your patients.
Apply the latest knowledge on atrial fibrillation and heart failure, including novel anticoagulants, new medical therapies, new devices including ablation and resynchronization and other advanced therapies.
Select the best interventions for acute coronary syndrome with coverage of new antiplatelet strategies, management strategy updates, and significant data on outcomes and guideline adherence.
Navigate controversies across your entire field with in-depth chapters exploring all areas of preventive cardiology, coronary revascularization and percutaneous procedures, unstable angina/non-ST elevation myocardial infarction, ST-elevation myocardial infarction, heart failure, and arrhythmias.
Look up all essential randomized clinical trials and understand their implications with concise summaries of trial design, study population, treatment regimen, and results, together with relevant ACC/AHA Practice Guidelines.

Editorial Review

Users Review

From reader reviews:

Rosa Reid:

As people who live in the modest era should be revise about what going on or information even knowledge to make these individuals keep up with the era and that is always change and progress. Some of you maybe can update themselves by reading through books. It is a good choice for you but the problems coming to a person is you don't know what type you should start with. This Evidence-Based Cardiology is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

Rebecca Kendrick:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their spare time with their family, or all their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? Might be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to consider look for book, may be the reserve untitled Evidence-Based Cardiology can be good book to read. May be it may be best activity to you.

Amy Tharp:

Don't be worry should you be afraid that this book can filled the space in your house, you could have it in e-book technique, more simple and reachable. This specific Evidence-Based Cardiology can give you a lot of close friends because by you looking at this one book you have issue that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This book offer you information that might be your friend doesn't know, by knowing more than different make you to be great individuals. So , why hesitate? We need to have Evidence-Based Cardiology.

Richard Diller:

That publication can make you to feel relax. This book Evidence-Based Cardiology was colorful and of course has pictures on there. As we know that book Evidence-Based Cardiology has many kinds or genre. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that will.
