Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers By Constantino Carlos Reyes-Aldasoro

As its title suggests, this innovative book has been written for life scientists needing to analyse their data sets, and programmers, wanting a better understanding of the types of experimental images life scientists investigate on a regular basis. Each chapter presents one self-contained biomedical experiment to be analysed. Part I of the book presents its two basic ingredients: essential concepts of image analysis and Matlab. In Part II, algorithms and techniques are shown as series of "recipes" or solved examples that show how specific techniques are applied to a biomedical experiments like Western Blots, Histology, Scratch Wound Assays and Fluoresence. Each recipe begins with simple techniques that gradually advance in complexity. Part III presents some advanced techniques for the generation of publication quality figures. The book does not assume any computational or mathematical expertise.

- A practical, clearly-written introduction to biomedical image analysis that provides the tools for life scientists and engineers to use when solving problems in their own laboratories.
- Presents the basic concepts of MATLAB software and uses it throughout to show how it can execute flexible and powerful image analysis programs tailored to the specific needs of the problem.
- Within the context of four biomedical cases, it shows algorithms and techniques as series of "recipes", or solved examples that show how a particular technique is applied in a specific experiment.
- Companion website containing example datasets, MATLAB files and figures from the book.

Editorial Review

From the Back Cover

As its title suggests, this innovative book has been written for life scientists needing to analyse their data sets, and programmers, wanting a better understanding of the types of experimental images life scientists investigate on a regular basis. Each chapter presents one self-contained biomedical experiment to be analysed. Part I of the book presents its two basic ingredients: essential concepts of image analysis and Matlab. In Part II, algorithms and techniques are shown as series of ‘recipes’ or solved examples that show how specific techniques are applied to a biomedical experiments like Western Blots, Histology, Scratch Wound Assays and Fluoresence. Each recipe begins with simple techniques that gradually advance in complexity. Part III presents some advanced techniques for the generation of publication quality figures. The book does not assume any computational or mathematical expertise.

• A practical, clearly-written introduction to biomedical image analysis that provides the tools for life scientists and engineers to use when solving problems in their own laboratories.

• Presents the basic concepts of MATLAB® software and uses it throughout to show how it can execute flexible and powerful image analysis programmes tailored to the specific needs of the problem.

• Within the context of four biomedical cases, it shows algorithms and techniques as series of ‘recipes’, or solved examples that show how a particular technique is applied in a specific experiment.

• Companion website containing example datasets, MATLAB® files and figures from the book.

About the Author
Constantino Carlos Reyes-Aldasoro (BSEE UNAM, Mexico, MSc Imperial College London, UK, PhD Warwick, UK) is an interdisciplinary scientist with skills that span from microscopy to image analysis of biomedical data sets to advanced computer programming. His teaching experience is also wide ranging from Engineering, Physics and Computing to Medicine and Radiology. His research concentrates on Biomedical Image Analysis of Cancer, Microcirculation and Inflammation. He has published numerous journal/conference papers in both Biological and Engineering fields, which have been cited in more than 500 publications. He is a senior member of the Institute of Electrical and Electronics Engineers and executive committee member of the British
Association for Cancer Research.

Users Review

From reader reviews:

Kevin Buckley:

This Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is information inside this reserve incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This kind of Biomedical Image Analysis Recipes in MATLAB: For Life

Scientists and Engineers without we know teach the one who reading it become critical in considering and analyzing. Don't possibly be worry Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers can bring when you are and not make your handbag space or bookshelves' turn out to be full because you can have it with your lovely laptop even phone. This Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers having excellent arrangement in word along with layout, so you will not sense uninterested in reading.

Robert Ford:

Information is provisions for those to get better life, information today can get by anyone with everywhere. The information can be a expertise or any news even a concern. What people must be consider whenever those information which is in the former life are hard to be find than now is taking seriously which one is acceptable to believe or which one often the resource are convinced. If you receive the unstable resource then you get it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers as your daily resource information.

Barbara Rubio:

The publication untitled Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers is the guide that recommended to you to see. You can see the quality of the e-book content that will be shown to anyone. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share for your requirements is absolutely accurate. You also might get the e-book of Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers from the publisher to make you much more enjoy free time.

Glory Ruiz:

Do you have something that you like such as book? The book lovers usually prefer to pick book like comic, short story and the biggest the first is novel. Now, why not striving Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers that give your fun preference will be satisfied by reading this book. Reading habit all over the world can be said as the means for people to know world a great deal better then how they react to the world. It can't be claimed constantly that reading behavior only for the geeky individual but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you are able to pick Biomedical Image Analysis Recipes in MATLAB: For Life Scientists and Engineers become your starter.
