Propulsion Techniques: Action and Reaction (Library of Flight) By P. Turchi

Drawn from early volumes of Aerospace America and its antecedents, this book rescues the insights, concerns, and dreams of dozens of space propulsion experts for the next generation of aerospace scientists and engineers. Written by well-known figures in space propulsion, this book provides readily accessible source material for design courses in astronautical engineering. Propulsion Techniques surveys the technologies of rocketry in the traditional categories of liquid, solid, hybrid, nuclear, and electric propulsion. Historical trends and cycles are displayed in each category as articles describe concepts and progress from the early visions of Goddard, Oberth, and Tsiolkovsky to proposed (and re-proposed) ideas for advanced space thrusters. In addition to descriptions of rocket engines of various types, associated technologies for propellants and space-electrical power systems are discussed.

Editorial Review

About the Author
Peter J. Turchi is a professor of aerospace engineering at The Ohio State University, Columbus, Ohio. Previously, he had been director of the Washington Research Laboratory of R&D Associates, Inc., and chief of the Plasma Technology Branch of the Naval Research Laboratory, Washington, D.C. Most recently, while on sabbatical leave, he served as visiting chief scientist for Advanced Weapons and Survivability at the USAF Phillips Laboratory, Kirtland AFB, New Mexico. Dr. Turchi received his undergraduate and graduate education at Princeton University, where he worked in the Guggenheim Laboratories for the Aerospace Propulsion Sciences. He has been active in electric rocket propulsion, controlled thermonuclear fusion, and high energy-density plasma and pulsed power technology for over 35 years. Dr. Turchi has served as associate editor for the Journal of Propulsion and Power, and chairman of the AIAA Technical Committee for Electric Propulsion. Presently, he is president of the Electric Rocket Propulsion Society and an Associate Fellow of AIAA.
