Microsoft Outlook Programming: Jumpstart for Administrators, Developers, and Power Users By Sue Mosher

Microsoft Outlook Programming unleashes the power of Microsoft Outlook, allowing administrators and end users to customize Outlook in the same way that they've used macros and templates to customize other programs like Excel and Word. Experienced developers will find the quick-start information they need to begin integrating Outlook into their applications. Microsoft Exchange administrators will get help automating common tasks such as announcing public folders and importing data to custom forms.

Microsoft Outlook is the most widely used email program, and it offers the most programmability. This book introduces key concepts for programming both Outlook forms for storing and exchanging data and Visual Basic for Applications modules that add new features to Outlook. Central to this new edition, which covers both Outlook 2000 and Outlook 2002, is awareness of tighter security in Outlook. Designed to prevent transmission of computer viruses, the security restrictions can also get in the way of legitimate programs, but this book offers workarounds within the reach of novice programmers. It also covers many of the new features of Outlook 2002, such as the integrated Outlook View Control and searching across multiple folders using SQL syntax and the Search object.

· Building block procedures for the most common Outlook programming tasks
· Jargon-free language and practical examples to make the material more accessible to new Outlook programmers
· Coverage of Outlook Email Security Update
· Coverage of the Office XP Web Services Toolkit

Editorial Review

Review
"Sue Mosher not only knows Outlook development but knows how to explain and teach it clearly and understandably. I highly recommend this book for everyone working in Outlook and also for more advanced users who want to learn the tricks of programming Outlook. " ?Ken Slovak, Outlook MVP and President, Slovak Technical Services

"From the first version of Outlook onward, Sue Mosher has been at the public forefront of all things Outlook and Exchange?first as an influential voice on the web and on newsgroups, more recently as a valued Microsoft Outlook MVP. Her web site www.slipstick.com is full of reliable information. I'll often try to find the answer I'm looking for there before using Microsoft's internal tools to research an issue."?Jensen Harris, Lead Program Manager, Microsoft Outlook
